PROFESSIONAL SUMMARY

Frontend-focused software engineer with 9+ years of experience in architecture, performance, and technical leadership, with full-stack product delivery across React, Vue/Nuxt, TypeScript, Node.js, database-backed applications, and Linux-based environments.

WORK EXPERIENCE

Software Engineer — Bravo AI (Couver Financial) | Richmond, BC Oct 2025 - Present

- Develop and optimize Bravo AI's Nuxt 3, Vue 3, and TypeScript website, improving page performance and reliability across restaurant discovery and gift-card flows through server-side rendering, route caching, asset/build optimization, and conversion analytics.
- Independently designed and built Morrow, a React Native, Expo, and Supabase social-discovery MVP with authentication, personalized feeds, maps, following, safety controls, and beta analytics.

Frontend Team Leader, China Minsheng Banking Corp., Ltd. | Beijing, China Feb 2017 - Oct 2025

- Led frontend architecture and delivery across mobile banking, personal and corporate online banking, WeChat banking, open banking, and content platforms; coordinated internal, subsidiary, and outsourced engineering teams.
- Established engineering systems for shared components, version management, development standards, web middleware, production readiness, performance optimization, and incident response.
- Built and governed React, Redux, Ant Design, antd-mobile, and Webpack applications; created shared capabilities and JavaScript bridge abstractions for app, browser, and WeChat channels.
- Improved first meaningful paint by approximately 30% using code splitting, HTTP caching, gzip, content delivery networks, Webpack chunk optimization, custom loaders, and Node.js build scripts.
- Designed a phased migration from purchased legacy frameworks to React while preserving intranet-browser compatibility; also led content operations, JSON-driven low-code, and open-banking developer platform initiatives.

Software Development Engineer Intern, Cisco | San Jose, CA Aug 2015 - Aug 2016

- Built the OpenBMP application layer in Cisco's CTAO, including an AngularJS administration console, D3.js network visualizations, Java REST APIs, and deployment and data work across ELK, OpenStack, and MySQL.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, SQL

Frontend & Mobile: React, React Native, Expo, Vue 3, Nuxt 3, Redux, Ant Design, AngularJS, D3.js

Tooling & Platforms: Supabase, PostgreSQL, Node.js, Webpack, Google Analytics 4, Google Maps, WeChat Mini Programs, ELK Stack, OpenStack, MySQL

Spoken Languages: French (B2 / NCLC 8), English (C1 / CLB 9), Mandarin Chinese (Native)

Architecture & Leadership: Frontend architecture, component systems, performance optimization, product prototyping, engineering standards, team leadership, cross-team delivery

EDUCATION

Master of Software Engineering, Zhejiang University

Oct 2016

Bachelor of Computer Science, Guizhou University

Jun 2014
